

LAN Switching Installation (Descriptions below not meant to be all inclusive, rather to serve as general guidelines.) The intent is to deliver a complete turn-key LAN solution that meets the District's needs.

- Install all switches as described by District provided schematics
- Upgrade IOS to latest appropriate code
- Create the following VLAN's: Student Data, Admin Data, Voice, AP devices and apply ACL's as required by the district to secure access.
- Configure appropriate QoS to support VOIP
- Provide copies of all running configurations and IOS
- Provide administration documentation of IP addresses, usernames, passwords, etc
- Provide basic administration training/knowledge transfer
