Precision Micro-Analysis
5685 A Power Inn Rd.
Sacramento CA 95824

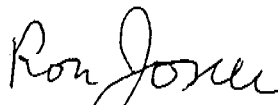

Dear Sirs:

Please analyze the enclosed samples for the old library at Pleasant Valley High School using the PLM method.

I would like the results no later than 9 a.m., Monday, April 3, 1995, sent to me by fax at (916) 891-3190.

These samples were taken by me.

Sincerely,

Ron Jones
Safety Officer

Analytical results and reports are generated by Forensic analytical at the request of and for the exclusive use of the person or entity (client) named on such report. Results, reports or copies of same will not be released by Forensic Analytical to any third party without prior written request from client. This report applies only to the sample(s) tested. Supporting laboratory documentation is available upon request. This report must not be reproduced except in full with approval from Forensic Analytical. The client is solely responsible for the use and interpretation of test results and reports requested from Forensic Analytical. This report must not be used by the client to claim product endorsement by NVLAP or any agency of the U.S. Government. Forensic Analytical is not able to assess the degree of hazard resulting from materials analyzed. Samples submitted to Forensic Analytical are retained for a period of six months and then disposed of according to all state and federal guidelines.

Patrick E. Little, Optical Laboratory Supervisor, Hayward Laboratory

Analytical results and reports are generated by Forensic analytical at the request of and for the exclusive use of the person or entity (client) named on such report. Results, reports or copies of same will not be released by Forensic Analytical to any third party without prior written request from client. This report applies only to the sample(s) tested. Supporting laboratory documentation is available upon request. This report must not be reproduced except in full with approval from Forensic Analytical. The client is solely responsible for the use and interpretation of test results and reports requested from Forensic Analytical. This report must not be used by the client to claim product endorsement by NVLAP or any agency of the U.S. Government. Forensic Analytical is not able to assess the degree of hazard resulting from materials analyzed. Samples submitted to Forensic Analytical are retained for a period of six months and then disposed of according to all state and federal guidelines.

July 14, 1995

BRYON PERRYMAN
CALTEC ENVIRONMENTAL, INC
20255 CHARLANNE DR.
REDDING, CA 96002

Dear MR. PERRYMAN:

ACKNOWLEDGMENT OF REGISTRATION

The Office of Public School Construction (OPSC) has received your request for registration under the Asbestos Hazard Emergency Response Act (AHERA) and Chapter 1601, Statutes of 1988. Your request has been processed and you are registered with the OPSC in the following disciplines:

Discipline(s) =====	Expiration Date =====	Registration No. =====
ABATEMENT WORKER	01/27/1996	95-0000704

Attached is a registration for (SAB 838) for renewing your registration in the future. Here are a few tips to expedite the registration process:

- All signatures must be original.
- Part III is for contractor's use only. Attach a D.O.S.H. registration certificate and Contractor's State Licensing Board license.
- Include a complete return address including zip code.
- The name on the application must appear as it is on the accreditation certificate.

When your registration and accreditation expires with the OPSC as noted above, you must complete and pass an Environmental Protection Agency (EPA) approved refresher course for the respective discipline(s). Additionally, you must submit a copy of the refresher course certificate(s) with a completed OPSC registration form SAB 838. Registration must be current in order to conduct asbestos-related work in California public or private, nonprofit elementary or secondary schools.

If you have any questions, please call me at (916) 445-0083.

Sincerely,

MERCY MANAYAO
Program Analyst
