Suicide Prevention

The Governing Board recognizes that suicide is a leading cause of death among youth and that school personnel who regularly interact with students are often in a position to recognize the warning signs of suicide and to offer appropriate referral and/or assistance. In an effort to reduce suicidal behavior and its impact on students and families, the Superintendent or designee shall develop measures and strategies for suicide prevention, intervention, and postvention.

The policy shall be written to ensure that a school employee acts only within the authorization and scope of the employee's credential or license. Nothing in this section shall be construed as authorizing or encouraging a school employee to diagnose or treat mental illness unless the employee is specifically licensed and employed to do so. (EC Section 215[a])

In developing policy and strategies for suicide prevention and intervention, the Superintendent or designee may consult with school health professionals, school counselors, school psychologists, school nurses, school social workers, teachers, staff, students, administrators, and community suicide prevention experts such as local health agencies, mental health professionals, community organizations and law enforcement. (Education Code 215).
